Federal Bank: AWS Cost Estimate (Revised)

Aligned to the Infrastructure Sizing document (FY26-27 volumetrics). All figures USD per month unless stated.

Summary

Group	Monthly (USD)	12 months (USD)
Prod-DC (Mumbai)	1,411.66	16,939.92
Prod-DR (Hyderabad), pilot light	423.87	5,086.44
UAT (Mumbai), weekdays 10 hrs/day	345.82	4,149.84
Common services	138.99	1,667.88
Backup, connectivity and data transfer	158.00	1,896.00
Total before tax	**2,478.34**	**29,740.08**
GST @ 18%	446.10	5,353.20
Total including GST	**2,924.44**	**35,093.28**

Prod-DC (Mumbai)

Component	Configuration	Monthly (USD)
Web	EC2 2 x m5a.xlarge, 100 GB each, 1-yr Compute SP	136.54
App	EC2 2 x m5a.xlarge, 300 GB each, 1-yr Compute SP (autoscale to 4 at peak)	173.02
Database	RDS MySQL db.m5.xlarge Multi-AZ, 500 GB gp3, 12,000 IOPS, 1-yr RI	674.70
Redis	EC2 2 x m5a.large, 100 GB each, 1-yr Compute SP	77.92
Proxy	EC2 2 x m5a.large, 50 GB each, 1-yr Compute SP	68.80
NAT gateway	2 (one per AZ)	104.16
Load balancer	1 x ALB	25.00
S3	~2.2 TB by year-end, lifecycle to S3-IA (year-1 average)	60.00
CloudWatch	50 metrics, ~35 GB/month log ingestion	65.00
KMS	5 CMKs, 2M requests	11.00
Secrets Manager	20 secrets, 200k API calls	9.00
CloudTrail	2 management trails, S3 and Lambda data events	4.00
SNS	Alerts and notifications	2.52
Subtotal		**1,411.66**

Prod-DR (Hyderabad), pilot light

Component	Configuration	Monthly (USD)
Database	RDS MySQL db.m5.xlarge cross-region read replica, Single-AZ, 500 GB gp3, 1-yr RI	337.35
S3	Cross-region replica of DC buckets, S3-IA storage class	35.00
Replication transfer	Inter-region transfer, RDS + S3	10.00
Compute and network	Web, app, cache, proxy, NAT and ALB launched from images and IaC on DR invocation; billed only when running	0.00
CloudWatch	Replication and health monitoring	15.00
KMS	5 CMKs, 2M requests	11.00
Secrets Manager	20 secrets, 200k API calls	9.00
CloudTrail	2 management trails	4.00
SNS	Alerts and notifications	2.52
Subtotal		**423.87**

UAT (Mumbai), weekdays 10 hrs/day

Component	Configuration	Monthly (USD)
Web	EC2 1 x m5a.large, 100 GB, On-Demand	21.44
App	EC2 1 x m5a.xlarge, 200 GB, On-Demand	42.66
Database	RDS MySQL db.m5.large Single-AZ, 200 GB gp3, On-Demand	84.72
Redis	EC2 1 x m5a.large, 100 GB, On-Demand	21.44
Proxy	EC2 1 x m5a.large, 50 GB, On-Demand	16.88
NAT gateway	1	52.08
Load balancer	1 x ALB	25.00
S3	Test documents and artefacts	40.08
CloudWatch	Basic metrics and logs	15.00
KMS	5 CMKs, 2M requests	11.00
Secrets Manager	20 secrets, 200k API calls	9.00
CloudTrail	2 management trails	4.00
SNS	Alerts and notifications	2.52
Subtotal		**345.82**

Common services

Component	Configuration	Monthly (USD)
WAF	2 Web ACLs (Prod, UAT), 10 rules each	30.60
GuardDuty (Mumbai)	CloudTrail, VPC Flow Log, EBS, S3 and RDS protection	57.17
GuardDuty (Hyderabad)	DR region	10.00
Security Hub	Security checks and findings across accounts	5.75
ECR	100 GB images, 50 GB/month transfer	15.47
AWS Config	Configuration audit trail, DC + DR	20.00
Subtotal		**138.99**

Backup, connectivity and data transfer

Component	Configuration	Monthly (USD)
Backups	EBS snapshots and cross-region snapshot copies (RDS automated backups within free allowance)	30.00
Connectivity	Site-to-site VPN to bank, DC + DR	73.00
Data transfer out	~500 GB/month to bank and insurer endpoints	55.00
Subtotal		**158.00**

Notes

• EC2, EBS and RDS unit rates are based on AWS Pricing Calculator rates for Mumbai. Hyderabad is priced at Mumbai rates; ALB, S3, CloudWatch, backup, VPN and data-transfer lines are indicative. Final figures to be confirmed by re-entering the configuration in AWS Pricing Calculator.

• Prod EC2 on 1-yr Compute Savings Plans, RDS on 1-yr Reserved Instances, both No Upfront. UAT On-Demand, weekdays 10 hrs/day.

• Autoscaled nodes during peak periods (March, quarter-end) add ~USD 68 (web) or ~USD 86 (app) per node per month while running. DR compute is billed only during drills and invocation.

• AWS Business Support, if required, is additional at ~10% of monthly usage (~USD 247.83).
